

NewIntelligence is proud to release a flexible pricing plan for its QuickStart for SAP B1 solution.

NewIntelligence's QuickStart Reporting & Dashboarding Solution has been re-envisioned!

Tuesday, June 23rd, 2021

MONTREAL, Quebec, Canada, June 23rd, 2021 – NewIntelligence (NewIntelligence.ca), an IBM Gold Business Partner selling IBM Cognos Analytics software and services, is proud to announce the release of a flexible and affordable price plan for its QuickStart for SAP B1 solution.

This change comes at a time when the NewIntelligence team wanted to offer more flexible accessibility to its reporting and dashboarding solution. QuickStart for SAP B1 was developed to empower people to delve deeper into their data to make smart decisions for their organizations. The focus remains the same, working with companies in the integration of IBM Analytics software with a pre-built SAP Business One data warehouse which offers customization and ease of use. Only the pricing structure and modules included with any given price plan have changed.

“We are proud and excited to about this new version of our solution,” says Corey Mendelsohn, President of NewIntelligence. “Our team looks forward to many conversations and projects with current and new clients alike.”

About QuickStart

NI QuickStart, Reporting and Dashboarding for SAP Business One, leverages the power of a reporting database that is separate from your current SAP Business One platform. This allows for customization of business rules and calculations such that report development is less complicated for the business user. This solution is pre-built based on best practices and currently covers 12 subject areas within SAP Business One. Instead of building your own analytics infrastructure, this out-of-the-box Business Analytics Solution for SAP Business One provides you with an environment adaptable to your evolving business needs. With the use of the IBM Cognos integration point, the results are immediately available for consumption, allowing for easy distribution to broad user communities. The solution has been priced competitively for the small and medium size business (SMB) and the SAP Business One market that can be installed and configured within a two- to three-week window.
