NewIntelligence Announces Native SAP HANA Edition of QuickStart Solution for SAP Business One

Montreal, Canada - Jan 28, 2026

NewIntelligence, a leader in advanced analytics and AI-enhanced reporting for SAP Business One, today announced the official release of the **QuickStart Solution for SAP Business One, Native HANA Edition**, marking a major milestone in the evolution of **data warehouse driven operational intelligence** for the SAP B1 ecosystem.

Built for the growing demand for high-performance, cloud-ready analytics, the Native HANA Edition leverages SAP HANA's in-memory capabilities to deliver faster queries, streamlined modeling, and a deployment approach optimized for managed services and multi-tenant environments.

A Major Leap Forward for SAP Business One Customers

The Native HANA Edition is engineered for organizations running SAP Business One on HANA, delivering:

- **Faster Reporting Performance:** Native HANA models and optimized views reduce bottlenecks and accelerate reporting across finance, sales, inventory, purchasing, and operations.

- **Multi-Tenant Ready Architecture:** Designed for partners and hosting providers managing multiple SAP B1 tenants, supporting scalable rollouts and centralized administration.

- **AI-Enabled Insights:** Powered by IBM Cognos Analytics with Watson technology and IBM Planning Analytics, enabling assisted insights, natural-language exploration, forecasting, and scenario modeling within the customer's environment.

- **Rapid Time-to-Value:** QuickStart's proven implementation framework now deploys faster on HANA, enabling teams to access dashboards, KPIs, and decision-ready reporting sooner.

- **Future-Ready Foundation:** Supports modernization initiatives such as cloud hosting, hyperscaler environments, and partner-led adoption programs.

Strengthening the SAP B1 Partner Ecosystem

The release arrives as SAP Business One partners modernize customer environments and prepare for the next wave of cloud adoption.

"This release is a game-changer for partners who need a scalable analytics solution built for SAP Business One on HANA. QuickStart Solution on HANA gives partners a turnkey analytics platform that enhances service offerings, accelerates deployments, and helps customers get to better decisions faster."
- **Corey Mendelsohn, President of NewIntelligence.**

NewIntelligence is already collaborating with SAP B1 partners, including Ascarii, to introduce the Native HANA Edition to customers seeking improved performance, cloud readiness, and insight-driven reporting.

Built for Today's Demands, Ready for What's Next

The Native HANA Edition provides a strong foundation for expanding analytics automation and insight capabilities across the QuickStart ecosystem. Powered by IBM Cognos Analytics with Watson technology and IBM Planning Analytics, customers can accelerate self-service reporting, strengthen forecasting accuracy, and improve planning agility through scenario modeling and guided exploration.

Availability

The **QuickStart Solution for SAP Business One, Native HANA Edition** is available immediately to partners and customers worldwide.
